Experience

Full Stack Developer

Developers Institute Ramat Gan

Jan 2023 - Apr 2023

- Junior full-stack developer specializing in Python
- Strong foundation in various programming languages and frameworks.
- Experience working on real-world projects individually and collaboratively, with a particular focus on Python, HTML, CSS, and JavaScript.
- Using popular Python web frameworks, like Django, to build scalable and robust web applications.
- Experienced in database management and data analysis using SQL and popular libraries such as Pandas.
- Overall, the bootcamp has prepared me for a successful career in full-stack web development.
